

# **Foreclosures in New York City**

Thomas P. DiNapoli New York State Comptroller

# Report 13-2011

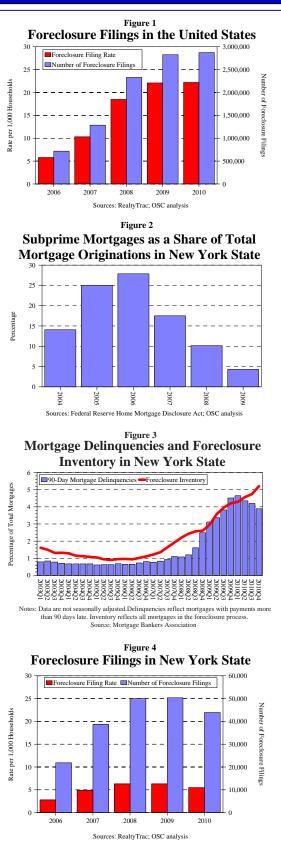

Since the housing bubble burst in 2007, many homeowners across the nation have faced foreclosure. According to RealtyTrac, the number of new foreclosure filings rose sharply through 2009, and even though banks temporarily suspended filings because of documentation problems, foreclosure filings still reached a new high in 2010.

The foreclosure crisis has been less severe in New York State and New York City, but the foreclosure filing rate in some parts of the City was higher than the national rate in 2009. Although the statewide 90-day mortgage delinquency rate has begun to ease, and the number of new foreclosure filings fell sharply in 2010 (due in large part to the banks' temporary halt in new filings), the share of New York State mortgages in the foreclosure process continues to grow.

- In 2006, there were 5.8 foreclosure filings for every 1,000 households in the nation, but the rate rose to 22.2 by 2010 (see Figure 1). The number of foreclosure filings rose from 718,000 in 2006 to almost 3 million in 2010 (see Figure 1).
- California had the largest number of foreclosure filings in 2010 (546,670) and Nevada had the highest foreclosure filing rate (90.9 per 1,000 household units). New York's foreclosure filing rate ranked 21st in the nation in 2006 but fell to 42nd in 2010 [see Appendix 1].
- The foreclosure crisis followed a large increase in subprime mortgages. In New York State, the number of subprime mortgages grew by 83.8 percent from 2004 to 2006, and the subprime share of mortgages doubled, to 28 percent (see Figure 2). In subsequent years, the share fell sharply as lending standards were tightened.
- The Mortgage Bankers Association reports that while the statewide mortgage delinquency rate has begun to ease, the percentage of mortgages in the foreclosure process continues to grow (see Figure 3). TransUnion recently reported that mortgage delinquency rates have risen in New York City's outer boroughs compared to one year earlier, which could fuel future foreclosure filings.
- The State's foreclosure filing rate more than doubled between 2006 and 2008, to 6.3 filings per 1,000 households, before easing in 2010. The number of filings doubled to 50,000 by 2008, but fell to 43,900 in 2010 (see Figure 4).

Kenneth B. Bleiwas Deputy Comptroller

March 2011

- The foreclosure filing rate exceeded the statewide average in 13 of 62 counties in 2009 (see Figure 5), including three in New York City (Kings, Queens, and Richmond). [Appendix 2 shows all counties for 2009 and 2010.]
- Between 2006 and 2009, the number of foreclosure filings in New York City rose by 31.7 percent to 22,886. Queens had the largest number of foreclosure filings (8,964), followed by Brooklyn (7,108), the Bronx (3,000), Staten Island (2,646), and Manhattan (1,168).
- The borough of Queens accounted for eight of the ten neighborhoods in New York City (of the 55 City neighborhoods defined by the U.S. Census Bureau) with the largest increase in foreclosure filing rates from 2006 to 2009, including the top six. [Appendix 3 shows change by neighborhood.]
- In 2009, Staten Island had the second-fewest number of foreclosure filings, but it had the highest foreclosure filing rate (14.8 per 1,000 households), followed by Queens (10.8), Brooklyn (7.4), the Bronx (5.8), and Manhattan (1.4).
- Figure 6 shows the ten City neighborhoods with the highest foreclosure filing rates in 2009. Half were located in Queens (including the top four). Figure 9 on the next page maps the 2009 rates by neighborhood.
- In 2010, foreclosure filings in New York City fell sharply—by 24.9 percent, to 17,191. More than two-thirds of the reduction was in Queens, where foreclosure filings fell by 45 percent. While Queens had the largest number of filings in 2009, Brooklyn had the largest number in 2010.
- In 2010 Staten Island still had the highest foreclosure filing rate, but Brooklyn moved ahead of Queens with the second-highest rate.
- Figure 7 shows the ten neighborhoods in New York City with the highest foreclosure filing rates in 2010. Half were located in Brooklyn.
- The neighborhood of Jamaica had the largest number of foreclosure filings and the highest foreclosure rate among City neighborhoods in 2009, and while it still had the largest number of filings in 2010, its foreclosure filing rate ranked second. [Appendix 4 shows changes in foreclosure filings and rates by neighborhood for this period.]
- Between 2006 and 2008, the number of actual foreclosures in the City rose tenfold to 2,543. Over the past three years, a total of 5,456 homes were lost. Figure 8 shows the ten neighborhoods in which the most homes were lost.

9 Mid-Island	Staten Island	165
10 Brownsville/Ocean Hill	Brooklyn	150
Sources: RealtyTrac	OSC analysis	

- The foreclosure filing rate is significantly higher in New York City when the rate is based on the number of homeowners (not households) because of the large number of rental units in the City.
- The City foreclosure filing rate *per 1,000 households* averaged 6.9 during 2009, but the rate *per 1,000 homeowners* was three times higher, at 20.9. Figure 10 shows foreclosure filing rates by borough for both measures.
- Although the foreclosure filing rate in the City is higher when based on home ownership, the rate is still much lower than in many parts of the nation. Las Vegas had the highest rate of any metropolitan area in the nation in 2009 (236.9 per 1,000 homeowners).
- Queens had five of the ten neighborhoods with the largest increase in foreclosure filing rates between 2006 and 2009 based on home ownership. [Appendix 5 shows all City neighborhoods.]
- Figure 11 shows the ten City neighborhoods with the highest foreclosure filing rates based on home ownership in 2009. Most of these neighborhoods are in the Bronx and Brooklyn (whereas Queens dominated the list based on households). [Appendix 6 shows neighborhoods within boroughs using both measures.]
- Subprime mortgages represented more than 40 percent of all new mortgages in 2006 in nine of the ten City neighborhoods with the highest foreclosure filing rates based on home ownership in 2009 (see Figure 12). The share of subprime mortgages in these neighborhoods nearly doubled between 2004 and 2006, and is much higher than the statewide average of 28 percent in 2006 [Appendix 7 shows subprime mortgages by neighborhood.]
- In 2010, the citywide foreclosure filing rate declined by 24 percent to 15.7 per 1,000 homeowners. The Bronx had the highest foreclosure filing rate in 2010 when measured as a share of homeowners (27.7 foreclosures per 1,000 homeowners), followed by Brooklyn, Staten Island, Queens, and Manhattan.
- Half of the ten City neighborhoods with the highest foreclosure filing rates based on ownership in 2010 were located the Bronx; the other half were in Brooklyn (see Figure 13).

# New York State Comptroller Thomas P. DiNapoli Help for Homeowners Facing Foreclosure

The foreclosure crisis is putting millions of individuals and families across the nation at risk of losing their homes. Moreover, foreclosures can affect entire neighborhoods. While the crisis has been less severe in New York, some areas of the State have been hurt worse than others. If you find yourself having trouble making your mortgage payments, there are many resources available at no cost to help you understand—and possibly avoid—foreclosure.

- Am I at risk for foreclosure? What programs are available to help me keep my home? What should I do if my lender won't work with me? Answers to these questions and more, including foreclosure laws and processes in New York, are available through the U.S. Department of Housing and Urban Development (HUD) by calling 1-800-569-4287 or by visiting the website at <u>www.hud.gov</u>.
- The Federal Trade Commission (FTC) has created a guide called *Mortgage Payments Sending You Reeling? Here's What to Do* to help you understand your mortgage and what your options are if you are having trouble making your payments. You can access the guide online at <u>www.ftc.gov/bcp/edu/pubs/consumer/homes/rea04.shtm</u> or by calling 1-877-FTC-HELP (1-877-382-4357).
- The Federal Deposit Insurance Corporation (FDIC) provides helpful information on how to access programs and resources related to foreclosure, available online at <u>www.fdic.gov/consumers/loans/prevention/consumer.html</u>. The information includes links to counseling services, loan modification programs, information on foreclosure-related scams, and guidance for avoiding foreclosure.
- You can get help from the New York Division of Housing and Community Renewal (DHCR) in finding an approved counselor in your area by calling 1-866-ASK-DHCR, or by visiting <u>www.dhcr.state.ny.us/programs/foreclosureprevention/counsellisting.htm</u> to learn more.
- The New York State Banking Department offers information on the foreclosure process and related laws, and describes some of the different remedies that may be available to you at <u>www.banking.state.ny.us/hetp.htm</u>. You can also get more information by calling 1-877-BANK-NYS (1-877-226-5697), where staff can answer your questions about mortgages and the foreclosure process and can help you find assistance and resources in your area.
- If you believe you are a victim of foreclosure fraud, call the Consumer Helpline of the New York State Attorney General's Office at 1-800-771-7755.

*Your Money New York* is a financial education initiative developed by Comptroller DiNapoli to help individuals and families address money-related issues—whether it's getting out of debt, looking for a job, saving for college or retirement, or buying a car or home. *Your Money New York* gives New Yorkers access to useful and reliable information, and serves as a centralized, coordinated access point for important government resources. To learn more, visit <u>www.yourmoneynewyork.com</u>.
