# Report Highlights

## Yorkshire-Pioneer Central School District

### Audit Objective

Determine whether the Yorkshire-Pioneer Central School District (District) used resources to ensure the District's Internet connectivity meets the Federal Communications Commission's (FCC) recommended bandwidth.

### Audit Results

The District's Internet connectivity met the FCC's recommended bandwidth of 100 Megabits per second (Mbps) per 1,000 students, as guided by New York State Education Department (NYSED). When tested, the average wireless Internet download speed was 134 Mbps and the average ethernet cable Internet download speed was 706 Mbps.

The District's contracted bandwidth totaled 1.0 Gigabits per second (Gbps) for Internet service.

Overall, of the 33 teachers surveyed (10 percent of the population), 11 of 12 teachers responding to our survey were satisfied with their Internet connectivity.

Additionally, the Western New York Regional Information Center (WNYRIC) monitored the District's bandwidth usage, and the District provided a system for users to submit Internet connectivity issues for resolution.

Our audit focused on the Internet connectivity in school buildings and did not look at the surrounding community's Internet connectivity. No recommendations resulted from this audit.

### Background

The District is located in Allegany, Cattaraugus, Erie and Wyoming Counties and is governed by an elected nine-member Board of Education (Board).

The Board is responsible for the general management of the District.

The Superintendent serves at the Board's direction and is responsible for the day-to-day management.

The Director of Curriculum, Instruction and Technology (Director), along with the Technology Operations Manager (Manager), oversees the Information Technology (IT) department and is responsible to plan for and provide the District's technology, infrastructure and data systems.

The District contracts with WNYRIC to provide IT services. WNYRIC contracts with an Internet Service Provider (ISP) to provide Internet services to its component districts.

See Appendix A for select technical definitions.

#### Quick Facts

2020-2021 School Year

Students	2,262
School Buildings	4

### Audit Period

July 1, 2020 – May 6, 2022

# In-School Internet Connectivity

---

Access to broadband Internet connectivity has become essential for all students in all levels of education and is now a vital component of K-12 school infrastructure. When school districts adopt and integrate digital learning technologies into their curriculum, teachers and students may use these tools for increased learning opportunities, such as posting content to school district learning management systems, accessing e-textbooks and assignments online, downloading streaming media or conducting online assessments. Additionally, they may use videoconferencing to interact with other classes or with subject area experts.

To enable the use of digital learning tools, school districts need to extend Internet access to every classroom and instructional space. The ongoing increase in new digital learning technologies and the need to connect students to information has led to a steady rise in demand for high-speed broadband Internet capabilities. Our audit focused on the Internet connectivity in school buildings and did not look at the surrounding community's Internet connectivity.

## What Is the Recommended In-School Internet Connectivity Speed?

NYSED guides the use of resources in enhancing Internet connectivity and meeting the FCC's current recommended Internet connectivity speed. The FCC adopted standard Internet connectivity speeds of 100 Mbps per 1,000 students and staff (users). NYSED guides school districts' student digital learning infrastructure, as a best practice, to use the FCC recommended Internet connectivity speed for students only.<sup>1</sup>

Further, an FCC guide for households shows that a student should have a minimum of 5 to 25 Mbps of Internet download speed depending on their online activities. Guidelines provided for typical online activities by the minimum download speed in Mbps needed for adequate performance for each activity is shown in Figure 1.

**Figure 1: Minimum Download Speeds for Selected Online Activity (in Mbps)<sup>a</sup>**

<b>General Browsing and Email</b>	1
<b>HD Video Teleconferencing</b>	6
<b>File Downloading</b>	10
<b>Streaming Ultra HD 4K Video</b>	25
<b>Student</b>	5-25

a) FCC household guideline speeds and are not based on surveys or experiments conducted. See <https://www.fcc.gov/consumers/guides/broadband-speed-guide>

---

<sup>1</sup> Standard Internet connectivity speeds of 100 Megabits per second (Mbps) per 1,000 students.

School districts should monitor and review comprehensive and accurate bandwidth usage information to ensure that contracted bandwidth is received, adequate speed is available for student learning and educational needs are met. School districts should provide a tool for users to submit Internet connectivity issues to the IT department for resolution.

### The District Met the FCC Recommendation and Officials Monitored Connectivity

Internet Connectivity: The District contracted through WNYRIC for bandwidth of 1 Gbps. The ISP incoming Internet download speed was reasonable with an average of 837 Mbps of the contracted service of 1 Gbps.

Students and teachers utilize bandwidth through wireless access points located in classrooms, along with teachers being connected through the use of an ethernet cable, for instructional and educational purposes.

The District met the FCC’s recommended bandwidth amount, 100 Mbps per 1,000 users, or students. Both the wireless and ethernet cable Internet download speeds were well above the FCC defined minimum download speeds needed for typical household student online activities, as shown in Figure 2. The District-wide average wireless Internet download speed was 134 Mbps, and the per-building average speeds ranged from 83 Mbps to 181 Mbps. The District-wide average ethernet cable Internet download speed was 706 Mbps, and the per-building average speeds ranged from 597 to 773 Mbps.

---

Monitoring: WNYRIC monitors the bandwidth usage and provides the Manager weekly reports in order to determine the needs of the District. The Manager told us he, along with other IT staff, hold periodic meetings with the Director to discuss and recommend technology needs. Further, IT staff will conduct tests throughout the school day (morning, mid-day and end-of-day) to monitor wireless connection speeds, especially to resolve any connectivity issues as they arise. The IT Department has a help desk system where students and teachers can inform the department of any Internet connectivity concerns or incidents.

The Manager told us the District's bandwidth utilization has been approximately 60 to 70 percent but recently increased to approximately 80 percent utilization as more devices are being used within the District. To continue to meet the instructional and educational needs of the students and teachers, the Manager told us the District plans to upgrade the District's bandwidth to 2 Gbps in July 2022 to accommodate the increase in bandwidth utilization. Our review of utilization data confirmed that in April 2022 the District used approximately 85 percent of its contracted bandwidth.

Survey: We surveyed 33 of 329 teachers to learn if they were satisfied with the District's in-school Internet connectivity. Overall, 11 of the 12 teachers (92 percent) responding to our survey were satisfied with their Internet connectivity resources. 21 teachers did not respond to the survey.

## **Conclusion**

The District contracted for and provided in-school Internet bandwidth that met the FCC's recommended Internet connectivity speed. As a result, the instructional needs associated with student activities should be met, such as the ability to access multimedia content, participate in online video conferences, and utilize electronic online learning tools during the school day.

# Appendix A: Key Technical Definitions

---

## General Definitions

**Bandwidth:** The maximum amount of data that can be transmitted over a particular connection in a specified amount of time. This is the volume of information that can be sent over a connection in a measured amount of time.

**Broadband:** High-speed Internet access and advanced telecommunications services for homes, commercial establishments, government, schools and community anchor institutions. In New York State, broadband service is primarily delivered via cable modem, fiber-optic cable, digital subscriber line (DSL) or through mobile wireless (5G/4G LTE), or a combination.

**Ethernet:** Network technology that enables data exchange and is often referred to as a direct connection.

**Internet Service Provider:** An organization that provides services for accessing, using or participating in the Internet. These organizations often provide broadband Internet access to their customers.

## Bandwidth Speed Definitions

Mbps (Megabits per second) and Gbps (Gigabits per second) are units of measurement to show the speed at which a network or Internet connection can transfer data (Figure 3). The FCC standard is 100 Mbps per 1,000 students and staff.

Re: Yorkshire-Pioneer Central School District  
In-School Internet Connectivity Report of Examination  
Audit Report Number: S9-22-4

To Whom It May Concern:

The audit objective was the following: Determine whether Yorkshire-Pioneer Central School District used resources to ensure the District's Internet connectivity meets the Federal Communications Commission's (FCC) recommended bandwidth.

The audit's conclusion stated the following: The District contracted for and provided in-school Internet bandwidth that met the FCC's recommended Internet connectivity speed. As a result, the instructional needs associated with student activities should be met, such as, the ability to access multimedia content, participate in online video conferences, and utilize electronic online learning tools during the school day.

**Audit Recommendation:**

*"No recommendations resulted from this audit."*

Signed:

---

Nicholas J. Silvaroli  
Acting Superintendent of Schools

Schools  
492-9304

Michael R. Irizarry, Ed.D.  
Acting Asst. Superintendent of  
Schools  
492-9303

## Appendix C: Audit Methodology and Standards

---

We conducted this audit pursuant to Article V, Section 1 of the State Constitution and the State Comptroller's authority as set forth in Article 3 of the New York State General Municipal Law. To accomplish our audit objective and obtain relevant audit evidence, our procedures included the following steps:

- We judgmentally selected the District for audit based on its rural geographic location and being categorized by NYSED as a high-needs district.
- We interviewed District officials and employees to gain an understanding of the District's network infrastructure, as well as planning for and monitoring in-school Internet connectivity.
- We reviewed records supporting written plans for network infrastructure, network analysis, and contracts specifically related to in-school Internet connectivity and bandwidth.
- Using a third-party speed test application while connected directly to the ISP connection, we performed three speed tests at the off-peak Internet activity time defined by District officials. We calculated the average Internet download speed and compared to contractually defined bandwidth to determine whether the District's average speed was reasonable (at least 80 percent of the contractually defined bandwidth as defined by the FCC).
- Using a third-party speed test application while connected wirelessly and with an ethernet cable to the District's network, we performed speed tests at a sample location within each of the four District school buildings. We calculated the average speed per user, 0.1 Mbps, using the FCC standard of 100 Mbps per 1,000 students and staff (user). We then averaged the Internet download speed results to calculate the district-wide average Internet download speed and compared the results to the FCC defined minimum download speeds needed for typical student online activities.
- We determined the total number of individuals currently employed by the District as of April 26, 2022 by reviewing an employee listing. We judgmentally selected 33 of 329 teachers to send surveys regarding in-school Internet connectivity.
- Using third-party survey software, a survey was sent to the selected teachers regarding their experience with the in-school Internet connectivity, including whether issues were reported to the IT department. We set a survey deadline, and from the responses received we calculated the number and percentage of teachers satisfied and not satisfied with their in-school Internet connectivity.

We conducted this performance audit in accordance with generally accepted government auditing standards (GAGAS). Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objective.

---

We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objective.

Unless otherwise indicated in this letter, samples for testing were selected based on professional judgment, as it was not the intent to project the results onto the entire population. Where applicable, information is presented concerning the value and/or the relevant population size and the sample selected for examination.

The Board has the responsibility to initiate corrective action. A written corrective action plan (CAP) that addresses the findings and recommendations in this report must be prepared and provided to our office within 90 days, pursuant to Section 35 of General Municipal Law, Section 2116-a (3)(c) of New York State Education Law and Section 170.12 of the Regulations of the Commissioner of Education. To the extent practicable, implementation of the CAP must begin by the end of the fiscal year. For more information on preparing and filing your CAP, please refer to our brochure, *Responding to an OSC Audit Report*, which you received with the draft audit report. The CAP should be posted on the District's website for public review.
